ECHO

BAINBRIDGE-GUILFORD  
18 JULIAND STREET  
BAINBRIDGE, NEW YORK 13733

**“you can’t breath as fast as  
this little beauty can type”**

The woman with "the face that launched a thousand smiles" might be one way to describe Helen Murphy. Through all the hustle and bustle of the guidance office, there sits Mrs. Murphy typing away ("you can't breath as fast as this beauty can type" reads the sign on her desk) while carrying on three different conversations and taking care of some junior-high students schedule, all at once! Her years of devotion to her job, and to her kids, as she likes to call all of us, has shown that this school will be hard put to replace her.

So here's to a happy retirement, **Mrs. Murphy.** We'll miss all the smiles, the laughs, and even the jokes — "Hey! Wanna' buy a chicken?"!!! But most of all we'll miss seeing you (and the ball and chain under your desk) when we come back to visit.

**With much thanks and love,  
the senior class of 1985.**

# B-G BUGLES

"Ready and Waiting"

"Getting Ready"

"The sign says it all"

# FOR REAGAN

"Dressed for the best."

The B-G Band broke out the old uniforms and got the show together to take a day off from school to visit the president. The patriotism in all of us broke through with plumes and American flags. We salute you Ronnie!

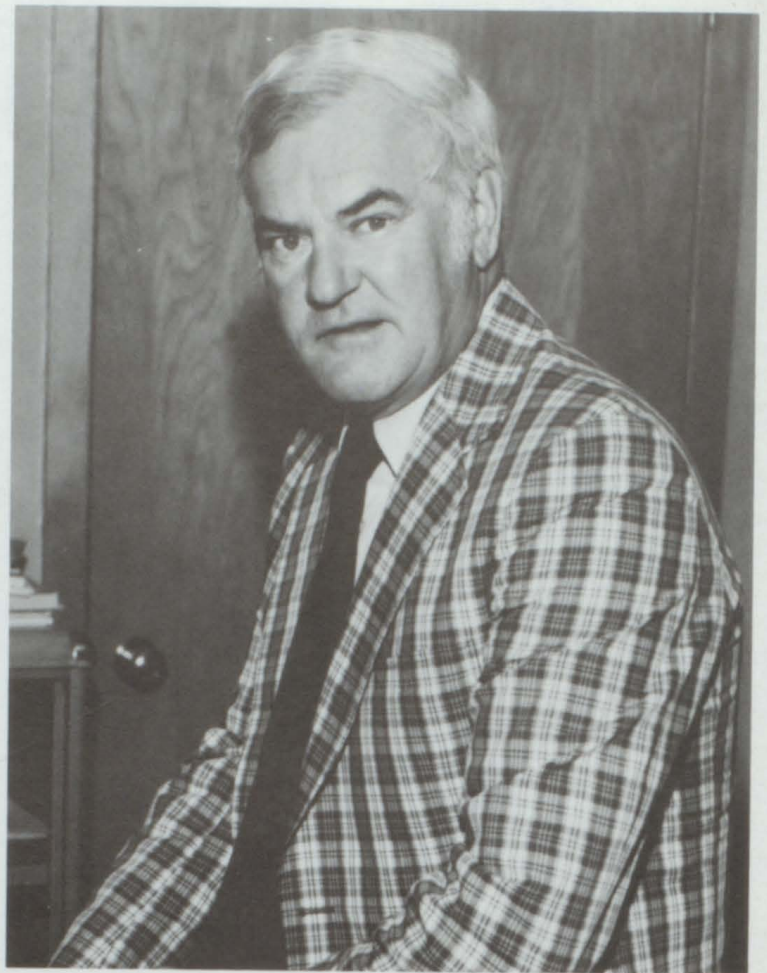

"Reaganomics . . . grin and bear it."

A memory of Halloween

A visit to the Big Apple

A sensationalized "Kitty-cat" trial and a fire in the artroom. These were **Susan Roberts** first two days in Bainbridge. Pretty exciting huh? Well we told her that that's as exciting as it gets. She proved us wrong, though. She kept us in great spirits with her dynamic personality and great sense of humor during her six month stay!! Susan came to us from Durban, South Africa.

Best of luck, Susan, from all of your friends!!!

# DOWN TO EARTH TURBINE IGNITION POWER

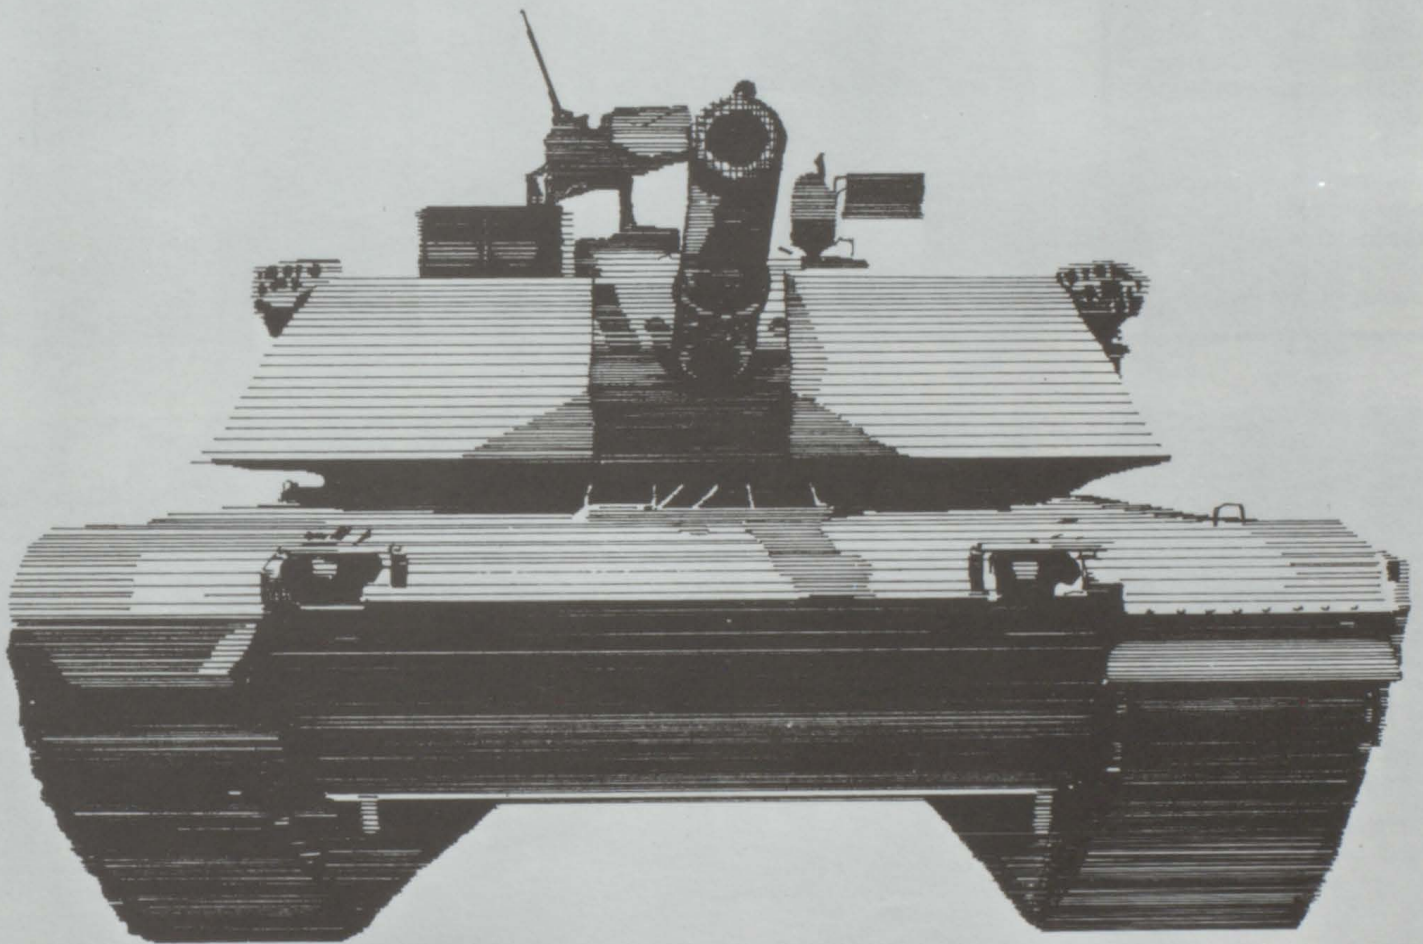

At Simmonds Precision, we believe that advanced technology assures a strong national defense. Our gas turbine engine ignition systems are used on every U.S. military aircraft engine presently in production. Today, another major producer of gas turbines is counting on us to provide ignition power for a down-to-earth turbine which will propel a new generation of tracked vehicles such as the M-1 battle tank.
